Instructions for getting your eBook to your device.

.ePub Files

Files with the .EPUB extension are formatted for use with virtually most devices. Below are instructions for the most common devices.

For the Apple devices (iPad, iPhone, and iPod Touch) follow these instructions:

I recommend using the iBooks Reader App if your device the iPhone, iPad, or iPod Touch. Simply go to the App or Play Store to download the FREE Kindle Reader App.

1. Send your self an email that you can retrieve from your device. In the email, attach the .epub file(s).
2. On your device, retrieve your email.
3. Tap on the attachment(s). (this will initiate a download of the file.)
4. Once the file is finished downloading, it will appear with an iBooks icon or a Kindle Reader icon.
5. Tap it again and tap the option to open it in the iBooks or Kindle Reader.
6. Follow these steps for each of your ebook files.

For Android and Samsung devices I recommend the Play Books reader which is free from the Play Store:

1. Send your self an email that you can retrieve from your device. In the email, attach the .epub file(s).
2. On your device, retrieve your email.
3. Tap on the attachment(s) and select to open in the Play Books reader.

Nook, Sony Reader, and Kobo Reader directions for the ePub Format

1. Connect your device reader to the PC with its USB cable and wait for the launch menu to open.
2. Click on the "Open folder to view files" option. This will open a window for your device on your computer.
3. Open a NEW window and go to the location where you have the ebook files you want to transfer over.
4. Drag the e-book from its location, and drop it in the window for your device.
5. Select the proper icon in the lower right of the screen for removing and ejecting media and remove your device. Un-plug the USB cable, Turn on your device and find the book listed.
